

# Pay As You Go

**PRE-OPENING VISIT ..... \$95**

Chemical treatment performed approximately one week prior to the pool opening to help boost clarity of the pool water. We will also set up our portable vacuum system to circulate water for 20 to 30 minutes, allowing the chemicals to circulate thoroughly.

**IN-GROUND POOL OPENING ..... \$385**

Our technician will remove the pool cover and store it, re-install any existing handrails, ladders, skimmer baskets, jet fittings, and start the pool equipment such as the pump, heater, and filter. We will inspect for any malfunction or repair needs. Additionally, we will test and adjust pool water chemistry, and add chemicals if required.

**ALLERGY TREATMENT ..... \$95**

If the pool floor is not visible, depending on the water condition at the pool opening, additional chemical treatments may be necessary to clear the pool water completely before starting the Initial Cleaning visit.

**INITIAL CLEANUP ..... \$150**

The initial vacuum of the pool will typically be performed one to two days after pool opening. This includes vacuuming, skimming, brushing, and balancing chemical adjustments, with a minimum charge of one hour.

**WEEKLY POOL SERVICE ..... \$85**

Our technician will perform a weekly visit, which includes vacuuming, skimming, brushing, backwashing as needed, and testing and balancing the pool chemicals.

**INGROUND POOL CLOSING ..... \$385**

Our technician will blow water out of plumbing lines, drain equipment, plug water lines, and air-lock the main drain. We will remove ladders and handrails, add anti-freeze to the plumbing lines, and cover the pool. The heater will be shrink-wrapped to prevent damage.
